

Goldhorizons SPA

Gold Horizons Spa Bromine Granules

Key Features/Characteristics

- 🔑 Granular
- 🔑 Little effect on pH
- 🔑 Effective over a wide pH range

Ideal Bromine Range: 3 – 5mg/l

These bromine granules are ideal for daily dosing of your spa, to produce active bromine which kills bacteria and other potentially harmful organisms. They are rapid dissolving and have minimal impact on pH.

Application Instructions

1. Maintain pH level within the ideal range of 7.2 – 7.6. If the not in this range, adjust.
2. Maintain bromine residuals for spas within the range 3 – 5mg/l (ppm). *Freshly filled new spas or spas left drained for a period of time require an initial start-up dose of 50mg/l (ppm) of free chlorine circulated for a minimum of 1 hour. This product may be applied directly to spas where temperatures exceed 20°C. If below this temperature or in doubt pre-dissolve this product in a clean plastic container at a maximum rate of 10g of product per 0.2 gallons (1ltr) of clean warm water. Stir well to ensure product is fully dissolved. Add the resulting solution to the spa whilst the pump(s) are turned 'on'.
3. Repeat dose application if necessary to achieve levels in point 2 above.
4. It is recommended that you periodically (e.g. weekly or after heavy spa use) shock dose your spa using Gold Horizons Spa Revive.

Daily Dose Rates				
Water Volumes		To increase bromine Level		
Litres	Gallons	1mg/l	3mg/l	6mg/l
1,000	220	2g	8g	16g
1,500	330	3g	12g	24g
